

MATTRESS with DEFINED PERIMETER

WITH BUILT-IN AIR PERIMETER

Air Bolsters comfortably define edges of bed for patient safety and to prevent falling.

Built-in Defined Perimeter Mattress creates a raised rail for enhanced fall prevention, without using patient restraints.

Independent inflate/deflate function allows for quick & easy transfer.

Inflate and deflate each side independently in seconds.

Open in mid-section for safe & easy patient egress & ingress.

**Built-in Air Bolsters
Protects Patient
from falls**

Independent inflate/deflate allows for easy patient egress and ingress.

10 Second Inflate/Deflate
